

PROJECT ENGINEER

Location : 4535 boul. Hamel #240, Québec

OVERVIEW:

Under the supervision of the Engineering Director – Sensors, the Project Engineers will be responsible for overseeing and developing the framework for large-scale projects related to creating new products in the automobile industry. They will also be the direct contacts for major clients and technical partners.

SPECIFICALLY:

- Act as the technical leaders for their assigned projects
- Develop product frameworks
- Develop the specifications of optical, mechanical and electronic sub-systems
- Design software architecture
- Develop the specifications of signal processing algorithms
- Follow up on the progress of assigned projects

WE ARE LOOKING FOR A CANDIDATE WITH THE FOLLOWING PROFILE:

REQUIREMENTS:

- University degree in Computer Engineering, Electrical Engineering, Software Engineering or any other relevant field
- Active member of the Ordre des Ingénieurs du Québec
- 10 years of experience in designing and/or developing complex electronic systems
- Ability to communicate (spoken and written) in English and French
- Available to travel occasionally to other Canadian provinces, the United States and abroad
- Proven leadership skills
- Autonomous
- Ability to work under pressure and during variable hours

ASSETS:

- Experience in optics and photonics design
- Experience in developing embedded software
- Experience in signal processing
