Leddar™ T16
Solid-State LiDAR Traffic Sensor with IP67 weatherproof enclosure

Overview

The Leddar T16 Traffic Sensor is a 2D solid-state LiDAR that is specifically designed for traffic management systems—from city to highway applications. Packaged in a weatherproof housing, the Leddar T16 offers cost-efficient and highly accurate detection for various Intelligent Transportation System (ITS) applications, such as electronic tolling, traffic monitoring and traffic law enforcement. At the heart of the sensor resides the patented Leddar digital signal processing technology, which provides superior detection, location and measurement capabilities for all types of traffic, including vehicles, pedestrians and cyclists. The Leddar T16 measures both the distance and angular positioning for each detected target. The collected data enables functionalities, such as vehicle profiling, speed measurement, and traffic data collection.

Advanced Vehicle Detection and Measurement

The Leddar T16’s flash illumination emitted by its LED sources covers the sensor’s complete field of view. Capturing the return echoes of these diffused light pulses through 16 independent active detection elements at a high acquisition rate, the Leddar T16 Traffic Sensor continuously provides rapid and accurate detection and ranging in the entire beam without any moving mechanical parts. The returned signals are digitized and processed through innovative algorithms, allowing the reliable detection and measurement of a wide range of objects under the most challenging environmental conditions, such as rain, snow and fog.

Peace of Mind and Ease of Use

Thanks to its robust solid-state design, the Leddar T16 Traffic Sensor provides high reliability and reduces maintenance costs compared to mechanical scanning LiDARs. Housed in a resistant and weatherproof enclosure (IP67 ingress protection), the Leddar T16 traffic sensor is built for year-round operation over very wide temperature ranges. It uses industry-standard Power over Ethernet (PoE+) connection, with the same cabling providing both power and data communication to the sensor, thereby reducing installation costs.

With its above-ground installation, the Leddar T16 Sensor is designed to be rapidly integrated with current traffic infrastructure. The optional onboard image sensor (provided with the “Traffic” configuration) allows the Leddar T16 to easily be configured remotely, providing rapid alignment with desired detection areas and simplifying maintenance operations.

All T16 sensors come with a software development kit, the Leddar Enabler SDK, which provides a user-friendly application programming interface (API) with C libraries, and code examples for Windows.

Leddar T16 Features

- Robust solid-state flash LiDAR design
- Measurement rate of 196 Hz for high-speed vehicle detection
- Fully IP addressable
- Single Cat 5e Ethernet cable – Power over Ethernet (PoE+)
- IP67 weatherproof enclosure
- Integrated video sensor with Pan & Tilt actuator (traffic configuration)

### CHARACTERISTICS

- **Beam FOV options (H/V)**
  - 9°/1.6°, 19°/3.0°, 26°/4.2°, 36°/5.9°, 48°/7.5°
- **Number of segments** 16
- **Wavelength** 940 nm
- **Weight** 3 kg (6.6 lbs)
- **Power supply** IEEE 802.3at PoE (Power over Ethernet), 48 VDC
- **Mounting** Compatible with standard traffic hardware
- **Ingress protection** IP67
- **Ocular safety** IEC 62471 2006 criteria: Exempt lamp classification
- **FCC** Yes (Part 15, Subpart B, Class A)
- **ICES-003** Class A
- **CE** Yes

### INTERFACE OPTIONS

- **Ethernet Cat 5e RJ45 Plug Kit**:
  - Shielded Cat 5e RJ45 plug
  - Bayonet-locking coupling/protective connector
- **Leddar T16 uses LeddarTech's proprietary communication protocol (TCP/IP socket-based protocol called Ipv4).**

### SYSTEM PERFORMANCE

- **Detection range** 1 up to 50 m
- **Accuracy** ±5 cm
- **Data refresh rate** 196 Hz
- **Operating temperature range** -40° C to + 60° C (-40° F + 140° F)
- **Power consumption without heater** 15W
- **Power consumption with heater** 25.5W
  
1 : Varies with configuration and target

### ORDERING INFORMATION

**LEDDAR - T16 - XX - XX**

- **Configuration**
  - TR: Traffic
  - TO: Tolling
- **Beam**
  - 9°, 19°, 26°, 36°, 48°
  - (48° beam available only with Tolling configuration)
